Update and correction to the report for Jacquelyn Orr, DOB 1970

Original date of the report: 05/25/2016

Updated report: 07/06/2016

Considerations for future care update and clarification (page 8/10 in the report from 05/25/2016):

Since the production of the original report the patient was changed from oxycodone/APAP 10/325mg twice/day as needed for pain to Nucynta 50mg every 2-3 times/day as needed for pain and on the last visit this was increased to Nucynta 100mg every 8hrs as needed for pain. No feedback about this change has been received from Ms. Orr yet.

The gabapentin has been switched back from 600mg 4 times/day to 800mg 3 times/day.

Correction to the estimated charges for spinal cord stimulator procedure:

In the original report from 5/25/2016 charges for removal of a spinal cord stimulator implant were erroneously included. This is not a charge that likely would be expected if the patient has good benefit with the spinal cord stimulation system. Consequently it would be appropriate to remove this charge from the estimated charges for the spinal cord stimulator procedure.

Therefore, the Physician charge for CPT 63661 (\$2,784, removal of implanted spinal cord stimulator) and the Ambulatory Surgery Center charge for CPT 63661 (\$23,275) should be removed from the estimated charges for the spinal cord stimulator system.

Respectfully,
Markus Niederwanger, MD

Sarahy BA 7/6/2016
